

Compounds and Mixtures

Element

Made up of only one type of atom.

Example: gold

Compound (Molecule)

Made up of different atoms bonded (connected) together

Example: water (H_2O)

Mixture

Made up of two or more different compounds or objects.

Example: Root Beer Float

Solution

A certain type of mixture where normally a solid (solute) is dissolved in a liquid (solvent) and is clear.

Example: tea
